Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #:** **NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #:** **NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

# FINAL ANALYTICAL REPORT

**Geosyntec Consultants**
**316 S Baylen Str., Suite 201**
**Pensacola, FL 32502**
**ATTN: Ms. Jill Johnson**

**Project #: NAL13-041**
**Project Site: NASA, Kennedy Space Center**

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

Analytical results meet the requirements of NELAC Standards. The results reported apply solely to the sample analyzed and all results are reported on a dry weight basis unless stated otherwise. Any questions concerning this report should be directed to Scott D. Wall, President.
**V** = Analyte was detected in both the sample and the associated method blank.
**L** = Off-scale high. Actual value is known to be greater than value given.
**J** = Estimated value; value not accurate. All results with a "J" qualifier require comment.
**I** = The reported value is between the laboratory MDL and the laboratory PQL
**K** = Off-scale low. Actual value is known to be less than the value given.
**U** = Compound was analyzed for but not detected.

**RE: NASA CRHE, KSC, FL - Final Data Report- KB3**
**KB Labs Project # 13-76**

Dear Ms. Petty:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 367-0073.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From May 21 to 24, 2013, a total of 113 water samples were analyzed for Geosyntec Consultants at NASA CRHE, KSC FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB3: FDOH NELAP Certification Number E82816

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report and the results relate only to the actual samples received and analyzed in the laboratory. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example,

KB Labs, Inc.
6821 SW Archer Road
Gainesville, FL 32608
Phone: 352-367-0073
Fax: 352-378-6491
www.kbmobilelabs.com

if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0 ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. As per Client instruction, KB Labs reports all samples to the laboratory MDL. Values between the PQL and MDL are reported with an I FDEP Data Qualifier.

3. VC result for sample DPT0251-038.0 was changed from 1100 ug/L to 570 ug/L.

**RE: NASA CRHE, KSC, FL - Final Data Report- KB3**
**KB Labs Project # 13-83**

Dear Ms. Petty:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 367-0073.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From June 3 to 6, 2013, a total of 59 water samples were analyzed for Geosyntec Consultants at NASA CRHE, KSC FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB3: FDOH NELAP Certification Number E82816

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report and the results relate only to the actual samples received and analyzed in the laboratory. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example,

*KB Labs, Inc.*
*6821 SW Archer Road*
*Gainesville, FL 32608*
*Phone: 352-367-0073*
*Fax: 352-378-6491*
*www.kbmobilelabs.com*

if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0 ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. As per Client instruction, KB Labs reports all samples to the laboratory MDL. Values between the PQL and MDL are reported with an I FDEP Data Qualifier.

3. Vinyl chloride result for sample ID DPT059-043.0 was changed from 2600 ug/L to 1800 ug/L after 50X dilution on 6/6/13.

**RE: NASA CRHE, KSC, FL - Final Data Report- KB3**
**KB Labs Project # 13-83**

Dear Ms. Petty:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 367-0073.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From June 19 to 21, 2013, a total of 48 water samples were analyzed for Geosyntec Consultants at NASA CRHE, KSC FL. The samples were analyzed for vinyl chloride, 1,1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB3: FDOH NELAP Certification Number E82816

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report and the results relate only to the actual samples received and analyzed in the laboratory. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example,

KB Labs, Inc.
6821 SW Archer Road
Gainesville, FL 32608
Phone: 352-367-0073
Fax: 352-378-6491
www.kbmobilelabs.com

if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0 ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. As per Client instruction, KB Labs reports all samples to the laboratory MDL. Values between the PQL and MDL are reported with an I FDEP Data Qualifier.

3. Samples with multiple dilutions were updated to be reported at lowest dilution level for non-detects and hits within the calibration range at lowest level. These samples include:

   DPT0261-038.0, -043.0
   DPT0267-018.0

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project # 14-13**

Dear Ms. Towns:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from May 28 to June 13, 2014. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 472-5830.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From May 28 to June 13, 2014, a total of 227 water samples were analyzed for Geosyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, 1, 1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene.

## NELAP Certification

KB Mobile Labs Unit KB3: FDOH NELAP Certification Number E82816

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report and the results relate only to the actual samples received and analyzed in the laboratory. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## FDEP Data Qualifiers:

U Analyte was not detected or below the laboratory MDL.
I The result is below the PQL but larger than the laboratory MDL.
L Result exceeded Upper Calibration Range.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the

uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as ± 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example, if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0 ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. Sample ID CRHE-DPT0277-048.0-20140530 reported cis-1, 2-dichloroethene at 3.1I ug/L. Changed to 3.1ug/L with no DQ.

3. Sample ID CRHE-DPT0301-058.0-20140610 reported cis-1, 2-dichloroethene at 1.7 ug/L. Changed to 1.2 ug/L.

4. Sample ID CRHE-IDW197035 reported dilution 1x should have been 10x. MDL limits updated.

Pensacola, FL 32502

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project # 14-116**

Dear Ms. Johnson:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from August 18 to 25, 2014. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 472-5830.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From August 18 to 25, 2014, a total of 114 water samples were analyzed for Geosyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, 1, 1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene. Two additional IDW samples from WILC were also ran during this project and reported.

## NELAP Certification

KB Mobile Labs Unit KB3: FDOH NELAP Certification Number E82816

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report and the results relate only to the actual samples received and analyzed in the laboratory. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## FDEP Data Qualifiers:

U Analyte was not detected or below the laboratory MDL.
I Result is below the PQL but larger than the laboratory MDL.
L Result exceeded Upper Calibration Range.

Email: info@kbmobilelabs.com

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as ± 3 times the standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example, if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0 ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

## Quality Control (QC) Data

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. Results reported in the Preliminary Data analyzed on 8/23/14 seemed to be biased slightly high based on ending CCS standards. A new curve was ran on the morning of 8/24/14 and the 8/23 data was requanted based on the new curve. This data is reported in the Final data report. All QC passed based on the new curve.

*"KB Labs is a small, woman-owned business enterprise."*

| **Comments:** | Although some surrogates may be out of the control percent recovery range, other supporting QC, such as matrix spikes, matrix spike duplicates, method blanks, and laboratory control samples, are performed by KB Labs to further validate reported data. | | | | | | | | |

***Surrogate Compounds:**
S1 = Dibromofluoromethane (63% - 142%)
S2 = 1,2- Dichloroethane-D4 (68% - 136%)
S3 = Toluene-D8 (76% - 124%)
S4 = 4-Bromofluorobenzene (70% - 133%)

October 7, 2014

Lane Dorman
Geosyntec Consultants
316 South Baylen Street, Suite 201
Pensacola, FL 32502

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project 14-120**

Dear Mr. Dorman:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Samples were collected and analyzed from September 22 to October 3, 2014. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 367-0073.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From September 22 to October 3, 2014, a total of 105 water samples were analyzed for Geosyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, 1, 1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene,

## NELAP Certification

KB Mobile Labs Unit KB1: FDOH NELAP Certification Number E82815
KB Mobile Labs Unit KB2: FDOH NELAP Certification Number E82840
KB Mobile Labs Unit KB3: FDOH NELAP Certification Number E82816

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report and the results relate only to the actual samples received and analyzed in the laboratory. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the

KB Labs, Inc.
6821 SW Archer Road

Fax: 352-378-6491
Email: info@kbmobilelabs.com

standard deviation from the mean of historical measurements of the percent recovery of spikes of the analytes of interest into actual and control sample matrices. For example, if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0 ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. Sample CRHE-DPT0354-033.0-20140929 was rerun neat on 10/3/14.

3. Second reporting in Field Data for sample DPT0342-038.0 on 9/23 is actually DPT0342-058.0.

316 South Baylen Street, Suite 201
Pensacola, FL 32502

**RE: NASA CRHE, KSC, FL - Final Data Report**
**KB Labs Project 14-166**

Dear Mr. Dorman:

Enclosed is the final report of the on-site analysis performed by KB Labs, Inc. at the above referenced site. Included are a brief project narrative, data report narrative, tables listing quality control results, final analytical results, and sample chain-of-custody form.

KB Labs' mobile laboratories have been inspected by the FDOH Bureau of Laboratories and are NELAP Certified as of April 1, 2003. Our personnel, methodology, proficiency testing, and quality assurance requirements comply with the guidelines of Chapter 62-160 of the Florida Administrative Code and with the consensus standards adopted at the National Environmental Laboratory Accreditation Conference (NELAC). Data for the site referenced above were determined in accordance with published procedures under Test Methods for Evaluating Solid Waste (EPA SW-846, Update III Revised May 1997). Unless otherwise indicated on the quality control narrative accompanying the data report, the quality assurance and quality control procedures performed in conjunction with analysis of groundwater samples demonstrated that the reported data met our requirements for accuracy and precision under NELAC Standards.

If you have any questions, please do not hesitate to call me or Kelly Bergdoll, President of KB Labs, at (352) 367-0073.

Sincerely,

KB Labs, Inc.

Todd Romero
Director of Operations

# PROJECT NARRATIVE

## Project Scope

From November 10 to 12, 2014, a total of 38 water samples were analyzed for Geosyntec Consultants at NASA CRHE, KSC, FL. The samples were analyzed for vinyl chloride, 1, 1-dichloroethene, cis- and trans-1, 2-dichloroethene, trichloroethene, and tetrachloroethene,

## NELAP Certification

KB Mobile Labs Unit KB1: FDOH NELAP Certification Number E82815
KB Mobile Labs Unit KB2: FDOH NELAP Certification Number E82840

## Analytical Procedure

All samples were analyzed using SW846 Method 5030/8260 for waters. Ten (10) milliliters (mL) of water or air (air samples) were purged with helium and the volatile organic compounds (VOCs) were collected on a solid-phase adsorption trap. The adsorption trap was heated and back-purged with helium. The components were then separated by capillary column gas chromatography and measured with a mass spectrometer (GC/MS) operated in the electron impact full-scan mode. The individual VOCs in the samples were measured against corresponding VOC standards.

## Analytical Results

Laboratory results were provided to the client on an as-completed or next-day basis. Final results of the on-site analyses are provided in a hardcopy report and the results relate only to the actual samples received and analyzed in the laboratory. The data produced and reported in the field has been reviewed and approved for this final report by the Director of Operations for KB Labs.

## Uncertainty of Reported Values

All measurement data presented in this report are subject to a degree of uncertainty and the degree of uncertainty varies with each compound of interest. KB Labs estimates the uncertainty of each measurement using a statistical evaluation of the standard deviation from the mean percent recovery of a number of trials of a given measurement. More specifically, KB Labs maintains historical percent recovery control limits at the 99% confidence level for each analyte of interest. These are calculated as $\pm$ 3 times the standard deviation from the mean of historical measurements of the percent recovery of

spikes of the analytes of interest into actual and control sample matrices. For example, if the lower and upper percent recovery control limits for a specific analyte of interest have been determined to be 70 and 100 percent respectively, a reported value of 10.0 ug/L will be with 99% confidence 7.0 to 13.0 ug/L.For more information about KB Labs estimation of uncertainty, contact KB Labs' quality assurance officer and/or request a copy of KB Labs' SOP for determining measurement uncertainty.

**Quality Control (QC) Data**

Surrogate Recoveries – Table 1 lists the daily analytical sequence and percent recovery results for surrogate compounds, which were added to all analyses. Four (4) surrogate compounds were added to each analysis in order to continually monitor general method performance.

VOC Spike Recoveries – Table 2 lists the percent recovery results for matrix spike and laboratory control samples. A known amount of each target compound was added to selected field samples and to laboratory reagent water in order to monitor the performance of each of the target compounds in the actual matrix and in laboratory reagent water.

Method Blanks – Daily analysis of laboratory reagent water samples was performed in order to monitor the cleanliness of the analytical system.

---

# DATA REPORT NARRATIVE

1. All sample data has been reviewed and, if required, updated in the Final Data Report for rounding and significant figures.

2. TCE result of 0.91 I ug/L for DPT0358-033.0 has been changed to 0.19 U ug/L.

3. Samples for this project were analyzed in 2 different labs, KB1 and KB3, while onsite. Each has a unique set of MDLs.

**Comments:** Although some surrogates may be out of the control percent recovery range, other supporting QC, such as matrix spikes, matrix spike duplicates, method blanks, and laboratory control samples, are performed by KB Labs to further validate reported data. IDW samples affect first surrogate.

***Surrogate Compounds:**
S1 = Dibromofluoromethane (63% - 142%)
S2 = 1,2- Dichloroethane-D4 (68% - 136%)
S3 = Toluene-D8 (76% - 124%)
S4 = 4-Bromofluorobenzene (70% - 133%)

Service Request No: J1201360

Ms. Jill Johnson
Geosyntec Consultants
9515 Holsberry Road
Suite A
Pensacola, FL 32534

**Laboratory Results for: KSC CRHE/FR1681**

Dear Ms. Johnson:

Enclosed are the results of the sample(s) submitted to our laboratory on March 22, 2012. For your reference, these analyses have been assigned our service request number **J1201360**.

All analyses were performed according to our laboratory's quality assurance program. The test results meet requirements of the NELAP standards except as noted in the case narrative report. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report. If required, the laboratory can provide uncertainty measurements for each method employed in sample analysis; this uncertainty measurement would be generated using method validation studies and the laboratory's quality control data.

Please contact me if you have any questions. My extension is 4409. You may also contact me via email at CMyers@caslab.com.

Respectfully submitted,

**Columbia Analytical Services, Inc. dba ALS Environmental**

Craig Myers
Project Manager

## CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III data deliverables including validation summary forms. When appropriate to the procedure, method blank results have been reported with each analytical test. Analytical procedures performed by the lab are validated in accordance with NELAC standards. Parameters that are included in the NELAC Fields of Testing but are not included in the lab's NELAC accreditation are identified in the discussion of each analytical procedure.

### Sample Receipt

Twenty-nine water samples and one trip blank were received for analysis at Columbia Analytical Services on 3/22/12. The samples were received in good condition and consistent with the accompanying chain of custody form. Samples are refrigerated at $\leq$6°C upon receipt at the lab except for aqueous samples designated for metals analyses, which are stored at room temperature.

### Volatile Organic Analyses:

Method 8260B: The upper control criterion was exceeded for the following analyte in Laboratory Control Samples (LCS) JWG1200321-1 and JWG1200333-3: Isopropylbenzene. The analyte in question was not detected in the associated field samples. The error associated with elevated recovery equates to a high bias. The sample data is not significantly affected. No further corrective action was appropriate.

### General Chemistry Analyses:

No significant data anomalies were noted with this analysis.

Approved by_____ Date 4/5/12

# Florida DEP Data Qualifiers

B Results based upon colony counts outside the acceptable range.

D Measurement was made in the field.

H Value based on field kit determination; results may not be accurate.

I The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.

J Estimated value (one of the following reasons is discussed in the project case narrative).
1. The result may be inaccurate because the surrogate recovery limits have been exceeded.
2. No known quality control criteria exists for the component.
3. The reported value failed to meet the established quality control criteria for either precision or accuracy.
4. The sample matrix interfered with the ability to make any accurate determination (e.g., primary and confirmation results show greater than 40% RPD).
5. The data is questionable because of improper laboratory or field protocols (e.g., GC/MS Tune did not meet method criteria).

K Off scale low. The value is less than the lowest calibration standard but greater than the method reporting limit (MRL).

L Off scale high. The analyte is above the upper limit of the linear calibration range.

M The MDL/MRL has been elevated because the analyte could not be accurately quantified due to matrix interference.

N Presumptive evidence of the analyte. Confirmation was not performed.

Q Sample held beyond the accepted holding time.

T Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only.

U Indicates that the compound was analyzed for but not detected.

V Indicates that the analyte was detected in both the sample and the associated method blank.

Y The laboratory analysis was from an improperly preserved sample.

Z Too many colonies were present (TNTC). The numeric value represents the filtration volume.

## Method Blank Summary
## Volatile Organic Compounds by GC/MS

**Sample Name:** Method Blank
**Lab Code:** JWG1200325-2

**Instrument ID:** MS53
**File ID:** J:\MS53\DATA\MS53-120402\0402-06.D

**Extraction Method:** EPA 5030B
**Analysis Method:** 8260B

**Level:** Low
**Extraction Lot:** JWG1200325

This Method Blank applies to the following analyses:

**Sample Matrix:** Water

**Service Request:** J1201360
**Date Extracted:** 04/03/2012
**Date Analyzed:** 04/03/2012
**Time Analyzed:** 12:25

## Lab Control Sample Summary
## Volatile Organic Compounds by GC/MS

**Sample Name:** Lab Control Sample
**Lab Code:** JWG1200333-3

**Instrument ID:** MS53
**File ID:** J:\MS53\DATA\MS53-120403\0403-04.D

**Extraction Method:** EPA 5030B
**Analysis Method:** 8260B

**Level:** Low
**Extraction Lot:** JWG1200333

This Lab Control Sample applies to the following analyses:

## Volatile Organic Compounds by GC/MS

**Sample Name:** Method Blank
**Lab Code:** JWG1200305-2

**Units:** ug/Kg
**Basis:** Dry

**Extraction Method:** EPA 5035
**Analysis Method:** 8260B

**Level:** Low

| Analyte Name | Result | Q | MRL | MDL | Dilution Factor | Date Extracted | Date Analyzed | Extraction Lot | Note |
|---|---|---|---|---|---|---|---|---|---|

April 05, 2012 Service Request No: J1201360

Ms. Jill Johnson
Geosyntec Consultants
9515 Holsberry Road
Suite A
Pensacola, FL 32534

**Laboratory Results for: KSC CRHE/FR1681**

Dear Ms. Johnson:

Enclosed are the results of the sample(s) submitted to our laboratory on March 22, 2012. For your reference, these analyses have been assigned our service request number **J1201360**.

All analyses were performed according to our laboratory's quality assurance program. The test results meet requirements of the NELAP standards except as noted in the case narrative report. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report. If required, the laboratory can provide uncertainty measurements for each method employed in sample analysis; this uncertainty measurement would be generated using method validation studies and the laboratory's quality control data.

Please contact me if you have any questions. My extension is 4409. You may also contact me via email at CMyers@caslab.com.

Respectfully submitted,

**Columbia Analytical Services, Inc. dba ALS Environmental**

Craig Myers
Project Manager

## CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III data deliverables including validation summary forms. When appropriate to the procedure, method blank results have been reported with each analytical test. Analytical procedures performed by the lab are validated in accordance with NELAC standards. Parameters that are included in the NELAC Fields of Testing but are not included in the lab's NELAC accreditation are identified in the discussion of each analytical procedure.

### Sample Receipt

Twenty-nine water samples and one trip blank were received for analysis at Columbia Analytical Services on 3/22/12. The samples were received in good condition and consistent with the accompanying chain of custody form. Samples are refrigerated at $\leq$6°C upon receipt at the lab except for aqueous samples designated for metals analyses, which are stored at room temperature.

### Volatile Organic Analyses:

Method 8260B: The upper control criterion was exceeded for the following analyte in Laboratory Control Samples (LCS) JWG1200321-1 and JWG1200333-3: Isopropylbenzene. The analyte in question was not detected in the associated field samples. The error associated with elevated recovery equates to a high bias. The sample data is not significantly affected. No further corrective action was appropriate.

### General Chemistry Analyses:

No significant data anomalies were noted with this analysis.

Approved by_____ Date 4/5/12

# Florida DEP Data Qualifiers

B Results based upon colony counts outside the acceptable range.

D Measurement was made in the field.

H Value based on field kit determination; results may not be accurate.

I The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.

J Estimated value (one of the following reasons is discussed in the project case narrative).
1. The result may be inaccurate because the surrogate recovery limits have been exceeded.
2. No known quality control criteria exists for the component.
3. The reported value failed to meet the established quality control criteria for either precision or accuracy.
4. The sample matrix interfered with the ability to make any accurate determination (e.g., primary and confirmation results show greater than 40% RPD).
5. The data is questionable because of improper laboratory or field protocols (e.g., GC/MS Tune did not meet method criteria).

K Off scale low. The value is less than the lowest calibration standard but greater than the method reporting limit (MRL).

L Off scale high. The analyte is above the upper limit of the linear calibration range.

M The MDL/MRL has been elevated because the analyte could not be accurately quantified due to matrix interference.

N Presumptive evidence of the analyte. Confirmation was not performed.

Q Sample held beyond the accepted holding time.

T Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only.

U Indicates that the compound was analyzed for but not detected.

V Indicates that the analyte was detected in both the sample and the associated method blank.

Y The laboratory analysis was from an improperly preserved sample.

Z Too many colonies were present (TNTC). The numeric value represents the filtration volume.

## Acronyms

| | |
|---|---|
| ASTM | American Society for Testing and Materials |
| A2LA | American Association for Laboratory Accreditation |
| CARB | California Air Resources Board |
| CAS Number | Chemical Abstract Service registry Number |
| CFC | Chlorofluorocarbon |
| CFU | Colony-Forming Unit |
| DEC | Department of Environmental Conservation |
| DEQ | Department of Environmental Quality |

**Client:** GeoSyntec Consultants
**Project:** KSC CRHE/FR1681
**Sample Matrix:** Water

**Service Request:** J1201360
**Date Extracted:** 04/03/2012
**Date Analyzed:** 04/03/2012
**Time Analyzed:** 12:25

## Lab Control Sample Summary
## Volatile Organic Compounds by GC/MS

**Sample Name:** Lab Control Sample
**Lab Code:** JWG1200333-3

**Instrument ID:** MS53
**File ID:** J:\MS53\DATA\MS53-120403\0403-04.D

**Extraction Method:** EPA 5030B
**Analysis Method:** 8260B

**Level:** Low
**Extraction Lot:** JWG1200333

This Lab Control Sample applies to the following analyses:

| Sample Name | Lab Code | File ID | Date Analyzed | Time Analyzed |
|---|---|---|---|---|
| Method Blank | JWG1200333-4 | J:\MS53\DATA\MS53-120403\0403-07.D | 04/03/12 | 13:53 |

# Organic Analysis:
# Volatile Organic Compounds by GC/MS

## Validation Package

## Raw Data

p:\Stealth\Crystal.rpt\DividerD.rpt

**Client:** GeoSyntec Consultants
**Project:** KSC CRHE/FR1681
**Sample Matrix:** Water

**Service Request:** J1201360
**Date Collected:** 03/19/2012
**Date Received:** 03/22/2012

## Volatile Organic Compounds by GC/MS

**Sample Name:** CRHE-MW0032-045.0-03192012
**Lab Code:** J1201360-001

**Units:** ug/L
**Basis:** NA

**Extraction Method:** EPA 5030B
**Analysis Method:** 8260B

**Level:** Low

## Volatile Organic Compounds by GC/MS

**Sample Name:** CRHE-MW0022-065.0-03212012
**Lab Code:** J1201360-021

**Units:** ug/L
**Basis:** NA

**Extraction Method:** EPA 5030B
**Analysis Method:** 8260B

**Level:** Low

| Analyte Name | Result | Q | MRL | MDL | Dilution Factor | Date Extracted | Date Analyzed | Extraction Lot | Note |
|---|---|---|---|---|---|---|---|---|---|

Southeast ACCUTEST LABORATORIES

12/26/13

Technical Report for

Geosyntec Consultants

Contractors Rd Heavy Equipment Area; KSC, FL

FR1681

Accutest Job Number: FA10890

Sampling Date: 12/11/13

Report to:

Geosyntec Consultants
316 S Baylen St Suite 201
Pensacola, FL 32502
jjohnson@geosyntec.com; elawson@geosyntec.com

ATTN: Jill Johnson

Total number of pages in report: **64**

NELAP ACCREDITED TNI LABORATORY

Test results contained within this data package meet the requirements of the National Environmental Laboratory Accreditation Program and/or state specific certification programs as applicable.

Harry Behzadi, Ph.D.
Laboratory Director

Client Service contact: Andrea Colby 407-425-6700

Certifications: FL (E83510), LA (03051), KS (E-10327), IA (366), IL (200063), NC (573), NJ (FL002), SC (96038001) DoD ELAP (L-A-B L2229), CA (04226CA), TX (T104704404), PA (68-03573), VA (460177), AK, AR, GA, KY, MA, NV, OK, UT, WA

**Client:** Geosyntec Consultants **Job No:** FA10890

**Site:** Contractors Rd Heavy Equipment Area; KSC, FL **Report Date** 12/26/2013 5:25:38 PM

4 Samples were collected on 12/11/2013 and were received at Accutest SE on 12/13/2013 properly preserved, at 2.6 Deg. C and intact. These Samples received an Accutest job number of FA10890. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section of this report.

Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

## Volatiles by GCMS By Method SW846 8260B

**Matrix:** AQ **Batch ID:** VI249

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA10790-6MS, FA10790-6MSD were used as the QC samples indicated.

Matrix Spike Recovery(s) for 2-Chloroethyl vinyl ether, Methyl Tert Butyl Ether are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Matrix Spike Duplicate Recovery(s) for 2-Chloroethyl vinyl ether are outside control limits. Probable cause is due to matrix interference. For method performance in a clean matrix, refer to Blank Spike.

Matrix Spike / Matrix Spike Duplicate Recovery(s) for 1,1,2-Trichloroethane are outside control limits. Outside control limits due to high level in sample relative to spike amount.

FA10890-1 for Carbon disulfide: Associated ICV outside control limits.

FA10890-1 for Methylene chloride: Suspected laboratory contaminant.

FA10890-2 for Carbon disulfide: Associated ICV outside control limits.

FA10890-3 for Carbon disulfide: Associated ICV outside control limits.

FA10890-3 for Methylene chloride: Suspected laboratory contaminant.

FA10890-4 for Carbon disulfide: Associated ICV outside control limits.

FA10890-4 for Methylene chloride: Suspected laboratory contaminant.

**Matrix:** AQ **Batch ID:** VI251

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA10935-5MS, FA10935-5MSD were used as the QC samples indicated.

## Volatiles by GCMS By Method SW846 8260B BY SIM

**Matrix:** AQ **Batch ID:** VZ858

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA10934-3MS, FA10934-3MSD were used as the QC samples indicated.

## Volatiles by GC By Method RSKSOP-147/175

**Matrix:** AQ **Batch ID:** GXY2532

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA10834-3MS, FA10834-5DUP were used as the QC samples indicated.

**Matrix:** AQ **Batch ID:** GXY2533

All samples were analyzed within the recommended method holding time.

All method blanks for this batch meet method specific criteria.

Sample(s) FA10933-2DUP, FA10933-2MS were used as the QC samples indicated.

## Wet Chemistry By Method EPA 300/SW846 9056A

**Matrix:** AQ **Batch ID:** GP23125

All samples were prepped within the recommended method holding time.
All samples were analyzed within the recommended method holding time.
All method blanks for this batch meet method specific criteria.
Sample(s) FA10701-1MS, FA10701-1MSD were used as the QC samples for Sulfate.
FA10890-1 for Sulfate: Dilution required due to matrix interference.
FA10890-2 for Sulfate: Dilution required due to matrix interference.
FA10890-4 for Sulfate: Dilution required due to matrix interference.

## Wet Chemistry By Method SM20 4500S F

**Matrix:** AQ **Batch ID:** GN59331

All samples were analyzed within the recommended method holding time.
All method blanks for this batch meet method specific criteria.
Sample(s) FA10834-1MS, FA10834-1MSD were used as the QC samples for Sulfide.

Accutest Laboratories Southeast (ALSE) certifies that this report meets the project requirements for analytical data produced for the samples as received at ALSE and as stated on the COC. ALSE certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the ALSE Quality Manual except as noted above. This report is to be used in its entirety. ALSE is not responsible for any assumptions of data quality if partial data packages are used

# ACCUTEST LABORATORIES SAMPLE RECEIPT CONFIRMATION

ACCUTEST'S JOB NUMBER: FA 10890 CLIENT: GEOSYNTEC PROJECT: FA1681

DATE/TIME RECEIVED: 12-13-13 08:00 {MM/DD/YY 24:00} NUMBER OF COOLERS RECEIVED: 1

METHOD OF DELIVERY: FEDEX UPS (ACCUTEST COURIER) GREYHOUND DELIVERY OTHER

AIRBILL NUMBERS:

## COOLER INFORMATION

- [ ] CUSTODY SEAL NOT PRESENT OR NOT INTACT
- [ ] CHAIN OF CUSTODY NOT RECEIVED (COC)
- [ ] ANALYSIS REQUESTED IS UNCLEAR OR MISSING
- [ ] SAMPLE DATES OR TIMES UNCLEAR OR MISSING
- [ ] TEMPERATURE CRITERIA NOT MET
- [ ] WET ICE PRESENT

## TRIP BLANK INFORMATION

- [ ] TRIP BLANK PROVIDED
- [X] TRIP BLANK NOT PROVIDED
- [X] TRIP BLANK NOT ON COC
- [ ] TRIP BLANK INTACT
- [ ] TRIP BLANK NOT INTACT
- [ ] RECEIVED WATER TRIP BLANK
- [ ] RECEIVED SOIL TRIP BLANK

## MISC. INFORMATION

NUMBER OF ENCORES ? 25-GRAM _____ 5-GRAM _____

NUMBER OF 5035 FIELD KITS ? _____

NUMBER OF LAB FILTERED METALS ? _____

## TEMPERATURE INFORMATION

- [ ] IR THERM ID 1 CORR. FACTOR -0.4
- [ ] OBSERVED TEMPS: 3.0
- [ ] CORRECTED TEMPS: 2.6

## SAMPLE INFORMATION

- [ ] SAMPLE LABELS PRESENT ON ALL BOTTLES
- [ ] INCORRECT NUMBER OF CONTAINERS USED
- [ ] SAMPLE RECEIVED IMPROPERLY PRESERVED
- [ ] INSUFFICIENT VOLUME FOR ANALYSIS
- [ ] DATES/TIMES ON COC DO NOT MATCH SAMPLE LABEL
- [ ] ID'S ON COC DO NOT MATCH LABEL
- [ ] VOC VIALS HAVE HEADSPACE (MACRO BUBBLES)
- [ ] BOTTLES RECEIVED BUT ANALYSIS NOT REQUESTED
- [ ] NO BOTTLES RECEIVED FOR ANALYSIS REQUESTED
- [ ] UNCLEAR FILTERING OR COMPOSITING INSTRUCTIONS
- [ ] SAMPLE CONTAINER(S) RECEIVED BROKEN
- [ ] % SOLIDS JAR NOT RECEIVED
- [ ] 5035 FIELD KIT FROZEN WITHIN 48 HOUR'S
- [ ] RESIDUAL CHLORINE PRESENT

{APPICABLE TO EPA 600 SERIES OR NORTH CAROLINA ORGANICS}

**SiREM Reference:** S-3047
**Report Date:** 31-Dec-13
**Data Files:** MyiQ-DHC-QPCR-1071
MyiQ-DB-DHC-QPCR-0433

## Table 1a: Test Results

| Customer Sample ID | SiREM Sample ID | Sample Collection Date | Sample Matrix | Percent Dhc * | *Dehalococcoides* Enumeration/Liter ** |
|---|---|---|---|---|---|
| CRHE-MW0025-030.0-20131211 | DHC-9878 | 11-Dec-13 | Groundwater | 2 - 6 % | $2 \times 10^7$ |
| CRHE-MW0035-045.0-20131211 | DHC-9879 | 11-Dec-13 | Groundwater | 2 - 7 % | $5 \times 10^7$ |
| CRHE-IW0019I-040.0-20131211 | DHC-9880 | 11-Dec-13 | Groundwater | 2 - 7 % | $2 \times 10^7$ |
| CRHE-MW0029-045.0-20131211 | DHC-9881 | 11-Dec-13 | Groundwater | 2 - 4 % | $1 \times 10^7$ |

**Notes:**

* Percent *Dehalococcoides* (Dhc) in microbial population. This value is calculated by dividing the number of Dhc 16S ribosomal ribonucleic acid (rRNA) gene copies by the total number of bacteria as estimated by the mass of DNA extracted from the sample. Range represents normal variation in Dhc enumeration.

** Based on quantification of Dhc 16S rRNA gene copies. Dhc are generally reported to contain one 16S rRNA gene copy per cell; therefore, this number is often interpreted to represent the number of Dhc cells present in the sample.

J The associated value is an estimated quantity between the method detection limit and quantitation limit.
U Not detected, associated value is the quantification limit.
B Analyte was also detected in the method blank.
NA Not applicable as *Dehalococcoides* not detected and/or quantifiable DNA not extracted from the sample.
I Sample inhibited the test reaction based on inability to PCR amplify extracted DNA with universal primers.
E Extracted genomic DNA was not detected in sample.

qPCR = quantitative PCR

16S rRNA = 16S ribosomal ribonucleic acid

U Not detected, associated value is the quantification limit.

*vcrA* = vinyl chloride reductase

[1]Acceptable as test results for relevant samples are greater than 1 order of magnitude above Tris Reagent Blank test result.

Proposed Monitoring Well Sampling Locations

## Appendix O - Interim Groundwater Monitoring Plan

| Well ID | Screened Interval (ft BLS) | Analytes | Sampling Frequency |
|---|---|---|---|
| CRHE-IW0017I | 25 to 35 | VOCs | Annual** |
| CRHE-IW0019I | 35 to 45 | VOCs | |
| CRHE-MW0025 | 25 to 35 | VOCs; 1,4-D | |
| CRHE-MW0026 | 30 to 40 | VOCs; 1,4-D | |
| CRHE-MW0027 | 40 to 50 | VOCs | |
| CRHE-MW0029 | 40 to 50 | VOCs; 1,4-D | |
| CRHE-MW0031 | 40 to 50 | VOCs | |
| CRHE-MW0032 | 40 to 50 | VOCs | |
| CRHE-MW0034 | 30 to 40 | VOCs | |
| CRHE-MW0035 | 40 to 50 | VOCs; 1,4-D | |
| CRHE-MW0037 | 25 to 35 | VOCs | |
| CRHE-MW0039 | 25 to 35 | VOCs | |
| CRHE-MW0040 | 65 to 75 | VOCs | |
| CRHE-MW0041* | 30 to 40 | VOCs | |
| CRHE-MW0042* | 35 to 45 | VOCs | |

**Notes:**
*Proposed monitoring wells

VOCs = Trichloroethene; cis-1,2-dichloroethane; trans-1,2-dichloroethane; 1,1-dichloroethane; 1,1-dichloroethene; Vinyl Chloride; Acetone; Benzene; Bromodichloromethane; Chlorobenzene; Chloroform; Dibromochloromethane; Dichlorodifluromethane; Methylene Chloride; and Toluene

1,4-D = 1,4-dioxane

**Sampling will be conduct concurrently with interim measures implementation performance monitoring.
